

CLASS 6 : VACATION HOMEWORK OF SCIENCE

- Revise the chapters covered till now.
- Take few materials like sand, salt, sugar, chalk powder, etc. Check Whether it is soluble in water or not. Then classify them among water soluble and water insoluble materials and copy that in your notebook.
- Define transparent, translucent and opaque objects with examples and show them using different materials. (you can cut shapes from relevant materials for showing them eg: plastic sheet for transparent materials).
